

In the claims:

Please amend the claims as follows:

1. (Cancelled)

2. (Currently Amended) The restoration procedure kit ~~unit package~~ according to claim ~~[[1]]~~ 49 wherein the cover is spaced from the composite and not direct contact therewith.

3. (Concurrently Amended) The restoration procedure kit ~~unit package~~ according to claim 2 wherein the cover is dome-like and disposed at a distance from the composite.

4. (Cancelled)

5. (Currently Amended) The restoration procedure kit ~~unit package~~ according to claim ~~[[4]]~~ 49 wherein the cover is coated with a nonadhesive, release coating material.

6. (Currently Amended) The restoration procedure kit ~~unit package~~ according to claim ~~[[4]]~~ 5 and the cover is in direct contact with the composite.

7. (Cancelled)

8. (Currently Amended) The restoration procedure kit ~~unit package~~ according to claim ~~[[1]]~~ 46 wherein the ends of the embrasure tabs are folded under themselves at the central portion of the carrier film.

9. (Currently Amended) The restoration procedure kit ~~unit package~~ according to claim 8 wherein the incisal ~~carrier film has an additional tab disposed centrally of the lateral tabs and~~

~~extending transversely thereof, and the transverse tab is folded under itself at the central portion of the carrier film.~~

10. (Currently Amended) The restoration procedure kit ~~unit package~~ according to claim ~~[[1]]~~ 9 wherein a plurality of unit packages are disposed serially in side-by-side relation in compules on a packaging strip.

11. (Cancelled)

12. (Currently Amended) The restoration procedure kit ~~unit package~~ according to claim ~~[[1+]]~~ 10 wherein the compules and said packaging strip ~~carrier film and cover of a plurality of packages~~ are perforated between adjacent packages.

13. through 45 (Cancelled)

46.(New) A tooth restoration procedure kit including a unit dose of a curable dental restorative composite, the composite dose disposed on a carrier for spatuling on a tooth intermediate the tooth and carrier, comprising:

a generally “T” shaped transparent, high tensile strength polyester carrier film having a delivery side and a spatuling side, the generally horizontal portion of said “T” shape forming embrasure tabs extending laterally outwardly of the center portion of said “T” shape, and the generally vertical portion of said “T” shape forming an incisal tab extending downwardly of the center portion of said “T” shape; and

a unit dose of curable dental restorative composite disposed on the delivery side of said carrier film, centrally located on the center portion and centrally in respect of said embrasure tabs and incisal tab;

whereby, when said composite unit dose is disposed directly on said tooth, and said embrasure tabs are disposed about the embrasures of the tooth and said incisal tab is disposed about the incisal of the tooth, the dental composite may be spatuled on the tooth through said

carrier film.

47.(new) The restoration procedure kit according to claim 46 wherein the embrasure tabs of said carrier film have a length to surround the tooth opposite the composite.

48.(new) The restoration procedure kit according to claim 47 wherein the incisal tab of said carrier film has a length to surround the tooth opposite the composite.

49.(new) The restoration procedure kit according to claim 46 wherein a cover is disposed on said delivery side of said carrier film covering said composite dose.
